

POWER BI

Conditional Formatting & Data Bars , Hierarchies, Drill Downs & Drill-Through

Scenario

SECTION 1:

Management wants to instantly identify:

- High-performing products
- Loss-making regions
- Sales trend strength

Question

How will you apply conditional formatting and data bars?

Answer

1. Conditional Formatting
 - Profit > 0 → Green
 - Profit < 0 → Red
2. Data Bars
 - Apply to Sales column
 - Shows magnitude visually without charts

SECTION2 :

A dashboard should allow users to:

- Click Year → see Quarter → Month
- Right-click a product → view detailed product report

Question

1. Hierarchy creation
2. Drill-down vs Drill-through

Answer

1. Hierarchy
 - Create hierarchy: Year → Quarter → Month
 - Used in Axis of visuals
2. Drill-down
 - Navigate within the same visual

3. Drill-through

- Navigate to another report page
- Uses filters like Product or Customer
